Dear Valued Customer,

ERNI Electronics will always strive to provide you with the best quality components in the industry. Our products are designed to keep your electronics functioning efficiently with our patented designs, and more importantly, at the highest level of quality.

It has recently been brought to our attention that there are ERmet ZD and ERmet ZD connector extensions that are being counterfeited and offered for resale. In our commitment to excellence, we want to keep our customers updated on any information we receive that could affect any aspect of our business relationships and the safety of your products.

Through extensive co-design and verification testing our products (ERNI ERmet ZD and Tyco Electronics Z-PACK HM-Zd) have achieved full intermateability and interchangeability in all areas including the challenging signal integrity characteristics.

As it stands, ERNI Electronics & Tyco Electronics are the only two companies which are protected under US patent US 6,899,566 B2 and European patent EP 1 470 618 B and licensed to build and sell these connectors.

We are sending this letter to alert you for your safety, as your business is very important to us.

Best regards

ERNI Electronics GmbH
